RECORDINGS

	<div><div></div>Variable Name</div>	<div><div></div>Variable Type</div>	<div><div></div></div>
	recordingID	str	
	recordingFile	.wav	
	deviceID	str	
	date	DateTime	
	time	DateTime	
	patientID (optional)	str	
	notes (optional)	str	
<div><div></div></div>			

The device will write to this database, which we'll pull from in our backend. It should write all variables except patientID and notes - these are added later
